

FOLDING CLOSURES } ROLLER GRILLES } ROLLER SHUTTERS

## **OPERATION OF YOUR SCOTTY DOOR FOLDING CLOSURE**

Providing these instructions are followed correctly, your SCOTTY DOOR will be trouble free.

### **DO NOT FORCE THE OPERATION OF THIS DOOR.**

ALWAYS CONTROL OPERATION OF THE DOOR THROUGHOUT ITS TRAVEL.

When ever possible pull the door instead of pushing it.

If door is being maneuvered around curved track it may be necessary to assist individual door panels through the curves.

If maneuvering the door becomes difficult try separating the individual door leafs / panels and then repeat maneuvering process again.

If the locking rods / knobs do not automatically disengage give them some assistance by lifting / pushing the knob slightly and then releasing.

For the knobs on the intermediate posts pull the knob out and then engage or disengage.

### **CARE AND MAINTENANCE**

DO NOT use solvents to clean your door. We recommend washing your door with warm soapy water to remove dust.

Do not apply any grease or petroleum based lubricant to your door. Grease will only collect dust and grit, etc.

Failure to follow operational instructions voids warranty.

For any further technical advice contact our Auckland office 0800 760 687.
